

Tetra Pak® Heat Exchangers

Four technologies,
endless possibilities.

Solutions for any application

High- or low viscosity, with fibres, or differing temperature needs.

Tubular heat exchanger

Unique thermal stress
absorbing design.

Scraped surface heat exchanger

Providing a complete and
flexible design.

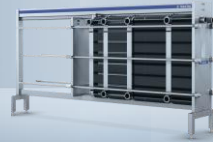

Plate heat exchanger

Secure path to hygienic
heating and cooling.

The originators

40+ years of experience.

Modular design

Easy to service and upgrade.

Customised to your needs

The best solution for your product.

>95% spare part availability

7 hubs, 24/7 service.

Spreadable cheese

Application example

The coiled heat exchanger, with its high pressure rating and high pipe velocity will provide a **significantly faster heat treatment**, while preserving color and taste.

It also provides a **low maintenance cost** since it does not include any moving parts, and only requires the replacement of a couple of gaskets.
