

THE RIGHT COMPETENCIES

Optimal operational performance depends on having the right competencies throughout your plant – and Tetra Pak Training Services holds the key.

Your key to unlocking your staff's full potential

Tetra Pak® Training Services

WELL-TRAINED STAFF

From operators and technicians, quality assurance and control personnel to supervisors and production management – having well-trained staff is central to optimising operational performance. Tetra Pak® Training Services features a range of learning products designed to empower your employees to be the best at what they do.

BENEFITS

Improved uptime and productivity

Minimised waste

Elevated food safety and quality

A safe workplace

A RANGE OF TRAINING OPTIONS

To help you and your staff ensure the highest food safety and quality, optimal profitability and consistent delivery, Tetra Pak® Training Services offers a wide range of learning solutions. These range from one-off courses to customised competence development programmes. We use various training methods, such as face-to-face classes and on-the-job training and can support you at your site, online or at one of our Training centres.

COMPETENCE DEVELOPMENT PROGRAMMES

With over 60 years' experience, we have the industry insights and expertise necessary to create programmes tailored to you and your staff's needs. All are designed with the goal to give your staff the skills they need to ensure product safety and quality while increasing line efficiency and minimising losses.

CASE

A large multinational food and beverage producer experienced a plant with a high number of unsterility cases because operators lacked the skills needed to carry out proper cleaning of production equipment.

A customised competence development programme was developed to meet the specific needs of the plant, allowing for short and effective training sessions. By combining the assessment and training programme with parallel initiatives, the customer was able to reduce unsterility cases by 55%.

**UNSTERILITY CASES
REDUCED BY 55%**
