

An innovative, unique solution in the water category that changes the status quo.

# Meet the water bottle of the future.

Combining the functionality and performance of a bottle with the sustainability benefits of carton, Tetra Top® for water is a new, unique packaging solution for water brands. With a specification developed especially for packaged water, and innovations that strengthens the package's unique water carton identity, it's the water bottle of the future.

## Perfect proportions

Tetra Top for water is currently available in one format and two sizes, the **Tetra Top 330 Midi** and the **Tetra Top 500 Midi**, ideal for small scale production and quenching on-the-go thirsts.

## Convenience comes as standard

Lightweight, great to hold, and easy to drink from – and featuring **one-step openings** and **resealable caps** – Tetra Top for water is the ideal on-the-go water bottle and a convenient fit for today's busy, always-on lifestyles.

## Uniquely water, uniquely brilliant

A specification developed especially for packaging water, and a new **translucent top**, which allows consumers to see the contents of the package, further strengthens the package's unique water carton identity.

## Sustainability superstar

The Tetra Top for water package delivers the environmental advantages of carton packaging – with 90% renewable materials and a **low carbon footprint of just 7g CO<sub>2</sub>e per package**.<sup>1</sup> These renewable materials include paperboard sourced from FSC™-certified forests and other controlled sources, and Bonsucro-certified plant-based polymers derived from sugarcane.

**90%**  
renewable materials<sup>1</sup>

## Stand out from the crowd

Rounded corners provide a unique **360° printing surface**, opening up a huge range of creative design possibilities to to create a distinct look and feel for your product, stand out on the shelf, and grab consumers' attention.

## Flavour of the month

Ultra-high-hygiene technology allows Tetra Top to be filled with both **flavoured and functional water** alongside **unflavoured water**. Producers can therefore create branded water products using flavours, flavouring agents and sweeteners<sup>2</sup>, or develop their own functional waters containing vitamins, minerals or caffeine<sup>3</sup>.

## Fast, flexible filling

Get unrivalled production flexibility for your Tetra Top for water line with **QuickChange™**, which allows you to change package volume in just five minutes, and **dual line production**, so you can run a CIP cycle on one side while still filling on the other.

## Dare to be different

An innovative look and feel allows your brand to stand apart, while the package's strong sustainability credentials showcase your commitment to the environment and satisfying consumer concerns around sustainability and transparency.
