

Outstanding ice cream solutions

We enable customers to meet consumer needs

We live in a world of continuous change. Therefore Tetra Pak keeps a close watch on emerging consumer trends at the local level and responds quickly to satisfy the needs of our customers who want to take advantage of new market opportunities. This is why we are the world-leading single-source manufacturer and supplier of complete solutions, stand-alone equipment, components and consumables for processing and packaging ice cream.

The most important market driver is lifestyle changes. These open up new possibilities for gaining higher shares in various local consumer markets by means of the right ice cream products. As we have a strong local presence, we can help you achieve this wherever you are by providing outstanding ice cream solutions.

Naturally, a key benefit of a partnership is making sure that all our efforts satisfy our motto "PROTECTS WHAT'S GOOD".

PROTECTS WHAT'S GOOD

Local presence and support

High performance and environmental care

In addition to enabling our customers satisfy consumer demands regarding ice cream products, Tetra Pak supplies production solutions that meet customer demands regarding system performance and environmental care. Our ultimate goal is to minimize your operational costs.

Guaranteed performance

As part of our commitment to helping you achieve production goals, our ice cream equipment is delivered with guaranteed performance. After understanding individual production needs in order to define the performance requirements, we then meet these needs in everything from detailed engineering documentation, through procurement and shipment to installation, to commissioning and performance validation.

Guaranteed performance is also achieved by technical services that contribute to total lifecycle economy at every stage of ice cream production: from training and operational fine-tuning to the preventive maintenance and updates needed to keep equipment running at peak performance.

Considering the environment

Protecting the environment

Minimizing the environmental impact of our manufacturing processes is an important cornerstone of our environment programme. In everyday business practice, this means:

- Minimizing resource use while optimising product performance
- Minimizing emissions, particularly CO₂, in our operations
- Reducing the environmental impact of transport
- Recycling to help prevent climate change, reduce waste and save resources

We participate in several international initiatives aimed at protecting the environment. In 2006, we became a Climate Saver committed to WWF standards.

Guaranteed line performance

Delicious ice cream for all occasions

Tetra Pak production solutions for ice cream satisfy retailer and consumer tastes for both traditional and new innovative products. Our equipment can produce virtually any type of ice cream with the desired ingredients, shape, flavours, colours and size in a choice of attractive packaging.

Whatever you need

Our ice cream solutions allow you to produce practically whatever you need in a smooth and cost-effective way. One popular way of catching the eye of consumers is to present a unique range of product shapes complemented with an impressive combination of ripple, swirl of sauces and small or large inclusions. Let's work together to bring your product ideas to the market.

To cool down on a warm summer day or for pure indulgence in the middle of winter, stick novelties are a treat to enjoy and form part of our production portfolio.

A decorated log on a plate, sandwiches to suit all tastes and a variety of ice cream candy bars. These are just some further possibilities that you may be considering to extend or refresh your product lines to win more consumers of all ages. If so, talk to us to see how we can help you.

Innovative products

We are at the forefront of introducing new technologies and processing methods to create new market opportunities for our customers. Our inventiveness includes:

- A low temperature ice cream concept that allows production of low-fat products ideal for the health-conscious that taste as good as – if not better than – top-of-the-range traditional ice cream.
- Ice cream individually designed for special events and celebrations. Ideal with such products are large and numerous inclusions.
- Probiotic ice cream containing potentially beneficial live bacteria or yeasts.

Consistent product quality

Solutions tailored
to your needs

Complete ice cream solutions with high

Tetra Pak supplies completely integrated processing, packaging and distribution equipment for ice cream, from ingredient mixing to packaging and distribution. We are the total solution provider for filling, moulding and extrusion lines, stand-alone equipment, individual components and consumables. These are all backed up by our customized service solutions.

High-grade materials, thoughtful design and detailed testing make sure that you get optimal performance. In all, we aim to make a significant contribution to the success of our customers through highest system profitability.

You can depend on us to satisfy your system needs at every stage of production. It's no wonder that more than half of the world's installed ice cream equipment carries the Tetra Pak brand.

Total solution provider

Operating efficiency

Design and production support that protect what's good

Focus on hygiene

The unique designs of our systems and modules together with our unequalled application know-how promote a high standard of hygiene. This is crucial for high-quality products and complying with ever stricter food safety laws. Where appropriate, mechanical parts of our ice cream equipment are designed according to 3A, a well-recognised hygiene standard. All parts with product contact are made of stainless steel or food-approved plastic.

Keeping track of material flow

Traceability is not only important in complying with stricter food safety laws, but is also a way for ice cream manufacturers to achieve ultra-hygienic production. Traceability solutions developed by us have been specially developed to enable customers to enhance their safety standards. Automation software modules for both new and existing ice cream lines enable you to keep track of material flow at each step of food production, as well as the process parameters and performance of the processing equipment involved.

Consumables for all needs

Maximizing lifecycle performance

The best way to get the most out of your ice cream production, and your business, is with our customized service solutions. Our complete range of lifecycle services maximizes your uptime, reduces your costs, and enables you to reach and sustain your desired performance with ease. All this adds up to save you time, money, and hassle, and lets you feel confident knowing that you're always getting the most possible value out your advanced equipment.

Wherever you are located, our experts are always close at hand with the essential tools and expertise to bring you complete lifecycle support and enable maximized performance today and long-term.

We customize your service solution from our complete range of lifecycle services, including:

- Automation services
- Environmental services
- Improvement services
- Installation services
- Maintenance services
- Parts and logistics services
- Quality management services
- Remote services
- Training services

In addition, based on our experience within packaging solutions, we offer a number of solution models, including:

- Guaranteed performance
- Operational cost guarantee
- Asset care
- Start-up solutions

Consumables

Danice Services is a Tetra Pak company that provides ice cream producers with a wide range of products and services including:

- Raw materials and ingredients
- Recipes and product ideas
- Packaging materials
- Distribution equipment

We offer thirty years of accumulated experience in ice cream technology and are very aware of developments and trends that the ice cream industry is faced with. Long-term relationships with a high focus on customer satisfaction is an important goal.

Danice Services works with ice cream customers in over 50 countries and provides a first-class service in terms of logistics and documentation. Our ISO 9001 and 14001 certificates are your assurance of our professional competence, commitment to high quality and compliance with international standards.

Securing the future

Faced with constant change, Tetra Pak is geared up to securing the future of our customers with outstanding ice cream solutions. This usually involves information gathering, research and development, and our Product Development Centre in Denmark.

But everything starts with you. Close cooperation will define a number of needs – for example, what trend you want to be a part of, what products and volumes best satisfy consumer tastes, what equipment will ensure quality ice cream yet reduce production costs. Only when we are both confident that we have thoroughly analysed and evaluated the situation can Tetra Pak start designing your particular production solution. In many cases, this will lead to building next-generation systems incorporating novel technology.

So, no matter what your ice cream production needs, nor where you are worldwide, you can rest assured that you are in good hands with us – in the present as well as the future.
