

FINAL PRESS RELEASE

TETRA PAK RECOGNISED WITH FIFTH CONSECUTIVE KEPNER-TREGOE EXCELLENCE AWARD FOR SERVICE OPERATIONS

- *Award recognises Tetra Pak's ongoing commitment to helping food and beverage producers improve operational performance through structured problem solving and continuous improvement*

Lausanne, Switzerland, 2 September 2026: Tetra Pak has received the [Kepner-Tregoe Excellence Award](#) for Service Operations for the fifth consecutive year, recognising its continued commitment to helping food and beverage producers improve operational performance and resilience.

Presented by global management consultancy Kepner-Tregoe, the award celebrates organisations that achieve measurable business results through structured problem solving, decision making and operational excellence. Tetra Pak has received the distinction every year since 2022, reflecting the sustained integration of these capabilities into its global services offering.

Tetra Pak helps food and beverage producers maximise the performance of their operations by using data to build a clearer picture of factory performance, identify opportunities for improvement and turn insights into action. Combining expert support, automation and [digital solutions](#) and [tailored advanced agreements](#), Tetra Pak helps food and beverage producers optimise productivity, reduce unplanned downtime and improve the efficient use of energy, water and other resources.

This is increasingly important as food and beverage producers face rising cost pressures, increasing operational complexity and more ambitious sustainability demands. In this context, operational resilience depends on preventing problems before they disrupt production.

Tetra Pak's fifth consecutive Kepner-Tregoe Excellence Award recognises the company's long-standing ability to apply structured problem solving capabilities to help producers improve reliability, productivity and long-term performance. At a factory level, this helps producers identify root causes faster, prevent repeat stoppages, strengthen maintenance planning and make more confident operational decisions - all of which contribute to more stable, efficient and resilient production.

Fabio Raffone, Vice President, Business Sector Labour, Tetra Pak Services, **comments:** "This recognition reflects the commitment of our people who work every day to solve complex challenges and create value for our customers. By combining our digital technologies and expert support, we help food and beverage producers strengthen performance, reduce disruption and build more resilient operations for the future."

Matthieu Coupeau, Senior Consultant at Kepner-Tregoe, comments: "Achieving the KT Excellence Award for Service Operations for five consecutive years is an exceptional accomplishment. Tetra Pak stands out through its ability to consistently translate operational

excellence, technical expertise and digital innovation into measurable value for customers. This sustained recognition reflects a strong culture of continuous improvement and long-term customer commitment."

The Kepner-Tregoe Excellence Awards recognise organisations and leaders worldwide who achieve exceptional business results through the application of structured problem solving, decision making and operational excellence methodologies. Award recipients represent leading organisations across manufacturing, healthcare, technology, energy and consumer industries. Tetra Pak is one of the most consistently recognised organisations in the history of the awards programme.
