A wide range of other ingredients has also been validated and tested for use with Tetra Pak Aseptic Dosing unit F.

Examples of possible ingredients that could be used for aseptic dosing:

- Flavors
- Colors
- Minerals
- Vitamins
- Lactoferrin
- Probiotic (containing live culture)

For other aseptic ingredients we can offer our Tetra Pak Co-packing Service for treatment and aseptic filling in bags (available sizes: 5 or 10 L).
