

# Maintenance Unit (MU) Pump for Tetra Pak® Continuous Freezers

**Tetra Pak® Services**

## Plug & play unit

An MU pump is as good as a brand new pump. You achieve the same capacity accuracy as with a new one.

The capacity accuracy of the MU pump is documented in a certificate which is a part of the delivery. The MU pump is a plug and play unit ready to be mounted at your Tetra Pak® Continuous Freezer.

## Benefits

- Reduce maintenance costs
- One-year warranty
- Reduce production costs
- Increase earnings and profits
- Easy order handling

### Which parts will be renewed?

- The impeller
- The star wheel
- CIP end cover with crescent
- Piston rod and piston head, when necessary
- All gaskets, O-rings and bushings

### Testing of the MU pumps

All MU pumps are tested on our specially constructed test bench.

The capacity of the pump is tested against at 6 bar back pressure according to our quality specifications for new pumps. The MU pump is supplied together with a certificate.

### Exchange conditions for pumps

- The customer orders and installs an exchange freezer pump.
- At Tetra Pak we invoice you the price of an MU pump.
- The worn-out pump is returned to Kostwein, Austria, within 4 weeks after receipt of the MU pump. Pls. check with your local Tetra Pak representative for return flow details. If the worn-out pump is not returned in due time we invoice you for the difference between a new pump and an MU pump.
- We will inspect the returned pump. If not repairable a surcharge will be issued.
- One-year warranty

### Contact

For more information regarding MU pumps and how they can improve the profitability of your business, please contact your nearest Tetra Pak technical service representative.

### Which parts will be recycled?

- Pump housing rechromed and grinded according to original specifications
- The CIP cylinder housing
- The end cover
- CIP piston and CIP piston rod
