

SCHEDULED DELIVERY

Tetra Pak® Plant Secure, gives you the insights into the full picture of your operation you need to secure plant-wide performance and stimulate business growth. To support you on your journey to improved business results, we offer a solution with outcome-based guarantees where you only pay for the value we help you realise.

Your key to securing plant-wide performance and business growth

Tetra Pak® Plant Secure

ARE YOU USING YOUR FULL CAPACITY?

Did you know that, in total, the food & beverage industry uses only 20-40% of its production capacity? And that up to 7% of raw materials are wasted during the manufacturing process? At the same time, a key industry trend is to move from traditional retail to online eTail, which is putting significant pressure on price and profitability. This means that manufacturers need to produce more with less and further maximise productivity and capacity. Tetra Pak® Plant Secure has been developed to help you do just that by improving your delivery, quality and performance while reducing costs and minimising waste. Go beyond equipment performance and put your business on the path to success.

BENEFITS

Full plant scope, Tetra Pak manages complete technical operations

Detailed improvement opportunities identified by benchmarking performance

Increased staff engagement and retention

Performance-based payment

Secure sustainable improvements and business growth

ANALYSIS-BASED TAILOR-MADE SOLUTIONS

To secure plant-wide performance and stimulate business growth, you need insights into the complete operation of your plant. With Tetra Pak® Plant Secure, you get the full package. By using our proven operational analysis methodology, and by drawing on our global food and beverage experience, expertise and the industry's largest installed-base, we help you turn data into actionable recommendations to meet your goals exactly and set you on a clear path for the future. From improved daily management to sustainable performance and plant-wide cost modelling, we're so confident that we can add value, you only pay for the value we help you realise.

Designed specifically for the food and beverage industry, Tetra Pak® Plant Secure is an integrated outcome-based solution. It encompasses everything that is controllable at your operation and can be implemented at single plant or group operations as a whole. To date, we have successfully carried out over 200 analyses around the world.

CASE

A large Brazilian dairy cooperative, was faced with two main challenges: unstable output and high staff turnover. One of the basic issues was that the dairy was constrained by ageing assets at its existing plant. A new plant led by the Tetra Pak® E3/Speed line was issued to overcome this obstacle, but the customer still needed to strengthen both maintenance and staff management. To solve these challenges, a Tetra Pak® Plant Secure contract based on Asset Management and Total Productive Maintenance was implemented. Through this complete plant solution, the dairy's production quickly stabilised, and in just 12 months, the new Tetra Pak® E3/Speed line became a global reference for operational performance, while the implementation of Total Productive Maintenance increased staff motivation and engagement.

GLOBAL REFERENCE FOR OPERATIONAL PERFORMANCE IN JUST 12 MONTHS.
