

# FSC™ Chain of Custody:

Ensuring responsible sourcing throughout the supply chain

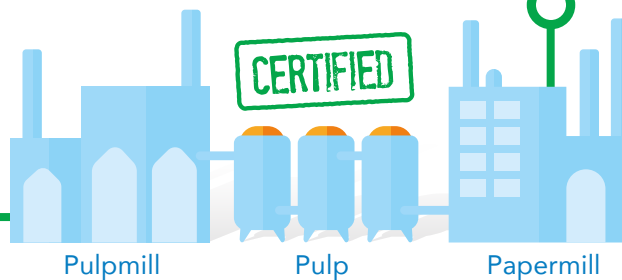

## Forest

All paperboard sourced by Tetra Pak comes from wood from Forest Stewardship Council™ (FSC™)-certified forests and other controlled sources.\* FSC-certified forests meet the environmental, social and economic principles of the FSC

## Mill

Wood is delivered to and processed in an FSC Chain of Custody-certified mill. Paperboard is produced in line with FSC standards

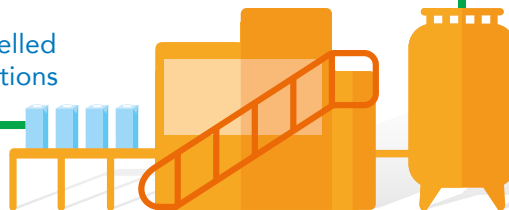

## Tetra Pak®

Paperboard is converted into packaging material in a certified converting factory before being delivered to one of our certified market companies\*\*

## Customers

Tetra Pak delivers FSC-certified and labelled packaging material to customers' operations

FSC-certified and labelled beverage cartons are selected by consumers

For a product to be described as FSC certified (through a product label or sales documentation), there must be an unbroken chain of certified organisations covering every change in legal ownership of the product.

FSC Chain of Custody certification means we can guarantee that each individual package has been sourced and produced according to the stringent standards set by the FSC throughout the value chain.

\*Controlled sources exclude five environmentally and socially unacceptable categories defined by the FSC under FSC-STD-40-005: see [www.fsc.org](http://www.fsc.org) for more.  
\*\*The certification covers all Tetra Pak operations and market companies worldwide.

### Third party certification

Third party certification ensures material is sourced, processed and produced in line with FSC standards throughout the supply chain, and that all documentation is valid and correct

The mark of responsible forestry
