FOOD.
PEOPLE.
FUTURES.
Our highlights

Our approach
to sustainability encompasses our entire value chain. We take this approach because we recognise that we can only create a more sustainable future by addressing the interconnected nature of the environmental, social and economic challenges we face. Our solutions work because they are joined up.

To organise and communicate our priorities, we use protecting Food, People and Futures as the chapters of our sustainability story, which underpins our brand promise: PROTECTS WHAT’S GOOD™.

In addition, we use the UN Sustainable Development Goals (SDGs) to help us prioritise our sustainability efforts and we have assigned the most relevant to each pillar. This focus on the SDGs builds on our ongoing commitment to the UN Global Compact and its ten principles, to which we have been a signatory since 2004.

FOOD

Our commitment to protecting food is embedded in our vision: to make food safe and available, everywhere. By working with our customers and partners to achieve this vision through our innovative and market-leading food processing and packaging solutions, we are contributing to SDGs 2 and 12. Moreover, by working to build sustainable value chains, such as through our participation in school feeding programmes and our Dairy Hub model, we are further contributing to these two SDGs.

PEOPLE

We protect and enable our employees, promoting growth and development for all, and driving actions to ensure a diverse workforce and an inclusive culture. This contributes to SDGs 4, 5 and 8. We also work to protect and support communities where we and our suppliers operate, including securing a responsible value chain that protects human and labour rights, further contributing to SDG 8.

FUTURES

We are working to protect the sustainable future of our planet and the long-term success of our customers, as well as our own business. Our strategic goals are to lead with low-carbon solutions for a circular economy, and to enhance sustainability across the value chain, from sourcing to production to the end of life of our products. This includes minimising emissions and waste, protecting biodiversity and ecosystems, maintaining fresh water availability, and promoting recycling and circularity. Through these activities, we are contributing to SDGs 6, 7, 9, 12, 13 and 15.

All three of our sustainability pillars share a common commitment to SDG 17: Partnership for the goals. We know that it is only by working together with our customers, suppliers and other stakeholders that we can lead the sustainability transformation and drive the most meaningful positive change.
Our highlights

68 million children received milk or other nutritious products in Tetra Pak® packages in schools.

3 new Dairy Hubs added (in Albania, Tanzania and Uganda).

56 countries in which we participated in school feeding programmes.

36,420 smallholder farmers reached by Dairy Hubs.
TETRA PAK SUSTAINABILITY REPORT 2020

Our highlights

4 years running we have made the CDP A List for leading efforts against climate change and protecting forests

69% of renewable energy in our operations

51 billion Tetra Pak® packages were recycled

#1 packaging company to launch paper straws in Europe. We were also the first F&B company to offer packaging with Bonsucro-certified Chain of Custody for plant-based polymers

2 Tetra Pak factories received World Class WCM status

10 million tonnes of CO₂ e saved across the value chain over the past decade

Our commitment to the UN SDGs
Our highlights

**PEOPLE**

- **+14%**
  rise in women in top management

- **-8%**
  reduction in lost time accidents in our manufacturing sites

- **29%**
  women external hires

- **148**
  new participants enrolled in our global Future Talent programme

750 leaders trained in inclusive leadership

93% of respondents in Employee Engagement survey say they fully support Tetra Pak values

Our commitment to the UN SDGs
