UBC (Used Beverage Carton) Recycled End Products

Tetra Pak cartons are primarily made from paperboard (~75% to 80%). It may also have 20% of polyethylene and up to 5% of aluminium by weight. Tetra Pak cartons are fully recyclable. The paperboard is recycled into various paper products, e.g. notebook, paper bag, flyer, gift box, etc. and the remaining fraction (polyethylene and aluminium) can be recycled into roof sheets, partition boards, pallet keychains, magnets, desk watches, mini mirrors, wall decorations, and so on to extend the use and life of the products.

- Re>Pal can recycle the PolyAl material from Used Beverage Cartons 100% concentration into pallets. Tetra Pak cartons material works well making a strong and clean pallet.
- The lifetime value of Re>Pal pallets reduces costs and carbon footprint, as we upcycle waste plastic to a useful asset (pallets) in a low energy, low carbon process
- Re>Pal design to ISO8611 for assurance that the pallet is of a high standard. Pallet life is many times that of wood.
- Clients and Tetra Pak's customer can improve their producer responsibility commitments and sustainability targets by using Re>Pal pallets made from post-consumed Tetra Pak cartons.
