

Renewability

The right choice for the future

THE RIGHT CHOICE FOR OUR FUTURE

CHOOSE RENEWABLE RESOURCES FROM SUSTAINABLY MANAGED FORESTS

Depleting natural resources are quickly becoming pressing concerns for our planet. Environmentally responsible businesses are switching to renewable resources for their raw materials, and here are the reasons why:

CLIMATE

Trees remove CO₂ in the air as they grow, which is usually produced by burning fossil fuels.

SUSTAINABILITY

Sustainably managed forests are able to meet our needs for energy and raw materials, now and in the future.

NATURE & BIODIVERSITY

Well-managed forests provide crucial natural habitats and encourages biological diversity.

QUALITY OF LIFE

Forests are essential to rural landscapes and provide valuable recreational, working and living areas.

Renewability of our resources is of utmost importance to Tetra Pak®. Over 70% of the packaging material produced by Tetra Pak® is made of renewable material and we ensure that our suppliers obtain their wood from responsible sources.

BUILD YOUR BRAND VALUE WITH TETRA RECART®

The Tetra Recart® package is lightweight and requires a minimum of resources. Our packages are FSC™ certified, and this means that the paperboard comes from well-managed forests and other controlled sources. This way, we ensure that the forests will continue to grow. Choosing Tetra Recart® for your brand significantly reduces your carbon footprint and makes your brand greener.

HEALTH

Tetra Recart® packaged products are preferred by consumers as they are considered safe, fresh and natural.

TRUST

Our paperboard comes from FSC™ certified and other controlled sources, which means that consumers can trust that your brand is sustainable and responsible.

ENGAGEMENT

By choosing Tetra Recart®, you can connect your brand with what today's consumers value: sustainability, ethics and ecological responsibility.

100%
of all packs sold
are certified

100%
of all markets are
FSC™ certified

100%
of all converting factories
are FSC™ certified

Tetra Recart® is a modern, innovative and renewable packaging system for the food industry. It is the world's first retortable carton package for shelf-stable products, e.g. vegetables, beans, tomatoes, soups, sauces and pet food. A filled product can be sterilised within the package to extend its shelf life for up to two years.

This perfectly meets the 21st century consumers' demands for safety, convenience and environmental sustainability. The package's square shape offers up to 40% space savings and increased in-store visibility.

Food producers all over the world are using this appealing, modern package to boost sales in mature product categories and revitalise existing product ranges. With production costs competitive to that of cans, Tetra Recart® is an economically viable way for brand owners to progress towards the future.
