TETRA PAK AND PARTNERS ADVANCE CIRCULAR ECONOMY BY DELIVERING A WALKWAY ROOF MADE FROM RECYCLED MATERIALS TO THE POLLUTION CONTROL DEPARTMENT

Bangkok, Thailand, 12 October 2026 – Tetra Pak, a global leader in food processing and packaging solutions, recently joined hands with local partners from Eco Friendly Thai Co., Ltd., Sustainable Resource Management Foundation (3R Foundation), and Mid Summer Siam Co., Ltd. to deliver a walkway roof made from recycled materials to the Pollution Control Department, supporting the advancement of the circular economy.

The walkway roof incorporates approximately 1,188 kilograms of recycled materials, demonstrating the potential of used beverage cartons to be recovered and transformed into new, functional products. It also reflects Tetra Pak's commitment to bringing used beverage cartons back into the circular economy, from supporting sorting and collection to adding value to recovered materials.

Beyond promoting the recycling of used beverage cartons into roofing sheets, Tetra Pak also works with recycling partners to expand the range of applications for carton materials, including paper fibres and the plastic-and-aluminium component commonly known as PolyAl. These recovered materials can be transformed into a variety of products, such as furniture, roofing sheets, Eco Blocks, door frames, ceiling panels and wall panels. This helps bring materials from food and beverage cartons back into circulation as valuable resources.

Those interested in recycling food and beverage cartons into new materials can learn more about Tetra Pak's other initiatives, including the Green Shelter project for the Friends in Need (of "PA") Volunteers Foundation, at the [Tetra Pak website](#)
