### **TETRA PAK WELCOMES MEMBERS OF SET ESG EXPERTS POOL TO CUSTOMER INNOVATION CENTRE BANGKOK TO EXCHANGE INSIGHTS ON CIRCULAR ECONOMY IN THAILAND'S PACKAGING INDUSTRY**

**Bangkok, Thailand, 25 September 2026** — Tetra Pak, a world-leading food processing and packaging solutions company, welcomed members of the SET ESG Experts Pool to its Customer Innovation Centre Bangkok (CIC Bangkok), located at the company's Thailand headquarters in Bhiraj Tower at EmQuartier.

The SET ESG Experts Pool is a professional network established by the Stock Exchange of Thailand (SET) that connects sustainability professionals from Thai listed companies, financial intermediaries, and other organisations. The network supports knowledge sharing, exchange of practical industry insights, and collaboration among members to strengthen sustainability capabilities across Thailand's capital market.

The CIC Bangkok visit provided an opportunity to exchange knowledge and perspectives on advancing the circular economy within the packaging industry, as well as exploring how businesses can prepare for evolving packaging regulations and policy developments, including Extended Producer Responsibility (EPR) frameworks and the European Union's Packaging and Packaging Waste Regulation (PPWR). The visit also showcased Tetra Pak's innovation ecosystem, demonstrating how collaboration, technology, and knowledge sharing with partners across the value chain can accelerate sustainable innovation and industry transformation. In addition, participants explored design-for-environment principles, highlighting the importance of balancing business performance, consumer needs and environmental impacts throughout the entire packaging lifecycle.

CIC Bangkok serves as a hub for food and beverage manufacturers in Thailand and across the region, supporting their innovation journey from understanding consumer needs and developing product and packaging concepts to conducting trials and scaling up solutions for commercial production. This visit underscores Tetra Pak's commitment to working collaboratively with partners to advance innovation and contribute to the development of a more sustainable food system.
