

# BE MORE SUSTAINABLE WITH ASEPTIC TECHNOLOGY

Get in on the shift to shelf stable milk

Dairy milk carton packaging has evolved, and Tetra Pak® is on a mission to bring shelf stable milk to schools using our aseptic cartons. We're helping make milk more accessible, sustainable, and economical for school districts and students, but we can't do it without you.

Be part of our *Shelf Stable Milk for Schools* initiative.

## There's a lot in it for you

Integrating our aseptic cartons into your milk production process can help reduce costs and challenges related to production, delivery, and storage – all while continuing to provide healthy and delicious dairy milk to schools!

### Production benefits: Produce it & use it

The shelf stability of aseptic cartons allows for year-round utilization of production lines.

### Logistics benefits: Maximize school deliveries

Longer storage and bulk storage mean "hot-shot" orders can become a thing of the past. Plus, deliveries to schools can be cut to just once in a two-week period, reducing receiving, and handling costs for both you and the school districts.

### Process benefits: Enjoy more flexibility

Using aseptic processing and cartons allows you to more easily change production lines over to other products so you can produce more milk in less time.

## The ABCs of UHT

Tetra Pak® Aseptic, or shelf-stable, cartons are sterilized to support dairy milk that has been treated with Ultra High Temperature (UHT). When UHT is combined with aseptic cartons, the milk can remain safe for six months or more without the need for refrigeration when unopened, eliminating many food safety and/or quality concerns.

Stays safe for

# 6 months

or more without the need for refrigeration when unopened!

## Safe, sterile, shelf stable, sustainable

Tetra Pak's innovative aseptic carton technology includes systems that have proven year over year to be some of the most reliable and hygienic on the market.

Sustainability is at the core of our business. Our cartons are made from mostly renewable materials, such as paperboard, and are recyclable! 100% of the paperboard in our packages comes from Forest Stewardship Council® certified forests and other controlled sources.

Milk producers and processors like you play a key role in helping us extend the sustainability of our cartons to schools across the country.

\*The FSC license code for Tetra Pak is FSC® C014047
