

SMART, SAFE, AND SHELF STABLE

Improving milk accessibility
& sustainability in your
school district

Dairy milk carton packaging has evolved, and Tetra Pak is on a mission to bring shelf stable milk to your school district through our *Shelf Stable Milk for Schools* initiative. We're helping make school milk more accessible, sustainable, and economical – so everyone can enjoy even more benefits of dairy milk!

First of all – what is shelf stable milk?

Enjoy the same great dairy milk, just in a different package! Tetra Pak® Aseptic cartons are designed to keep milk safe for six months or more without the need for refrigeration when unopened!

How? The milk is treated using Ultra High Temperature (UHT) treatment, and our aseptic cartons are made with layers of protection to keep the nutritious dairy milk safe and tasting great, without the need for additives or preservatives.

Keeping nutritional milk available to students

Good nutrition is critical in a successful learning environment, and all students deserve access to healthy milk. Since unopened milk that has been processed and packaged aseptically stays safe for six months or more without refrigeration, schools can order more milk at one time. This ensures that students will always have access to a nutritious drink at lunch and will be able to take unopened cartons from school to enjoy later.

70% of students say they will accept the switch to aseptic cartons.

(2018/2019 Tetra Pak School Milk Pilot Program Study)

Benefits to your student and school district

Nutrients on the go

Since our unopened shelf stable cartons do not require refrigeration, students can enjoy their milk after school, over the weekend, or during school breaks.

Planet smart

Shelf stable cartons offer benefits that contribute to a more sustainable future. Longer shelf life reduces spoilage and food waste. Less refrigerated storage minimizes energy use. And our cartons are made mainly of renewable materials and can be recycled.

The same healthy option!

Students can enjoy the exact same nutritious dairy milk they already know and love – just in a new package!

Safe, sterile, shelf stable, sustainable

Tetra Pak's innovative aseptic carton technology includes systems that have proven year over year to be some of the most reliable and hygienic on the market.

Sustainability is at the core of our business, and 100% of the paperboard in our packages comes from Forest Stewardship Council® certified forests and other controlled sources.
